## TEXT ABSTRACT

0001 +pg,1

0002 +sa

0003 A force applying surgical system is provided for use to assist in the <<<  
>>>insertion and/or

0004 removal of a surgical tool or a device attached thereto from an <<<  
>>>orthopedic structure. This

0005 surgical system comprises a medical impacting device that mates with <<<  
>>>a surgical tool such that

0006 the impacting device can be manually reciprocated along an axis of <<<  
>>>the tool to forcefully impact

0007 the impacting device on a portion of the tool. The impacting device <<<  
>>>can generate a distally

0008 directed force for inserting the tool (and/or an attached device) <<<  
>>>into an orthopedic structure, or it

0009 can generate a proximally directed force to remove the tool (and/or <<<  
>>>attached device) from an

0010 orthopedic structure.
